

# Scalefocus Academy with a brand-new DevOps course

[APPLY NOW](#)

## What is DevOps?

As the name suggests - DevOps is a combination of Development and Operations that help improve an organization's systems development process.

It's an **engineering practice** that emerged from Agile due to the strain between developers and operations engineers in traditional engineering organizations.

It allows a single team to manage the whole application development lifecycle, consisting of Development, Testing, Deployment, Operations.

DevOps shortens the development lifecycle while delivering features, fixes and functionality frequently in close alignment with business objectives.

## How to apply?

1. Submit your application
2. You will receive an email with links to online tests.
3. After completing the tests, you will receive your results immediately.
4. If you have successfully passed – Instead of a stressful in-person interview, you will receive an invitation to upload your video cover letter. It's a quick and easy process and you can record it at a time that is convenient for you.
5. Before the start of the Academy, you will receive a meeting invitation from our team where you can discuss the upcoming course and ask any questions you might have.

## How does the tuition go?

The whole course takes 90 days starting February 2023 and everything is entirely online over Microsoft Teams.

Lectures are held on Monday, Wednesday and Friday from 18:00 to 21:00

Practice Labs are from Tuesday and Thursday from 18:00 to 21:00

The best performing graduates will get the opportunity to join Scalefocus as software engineers. However, all alumni will have enough practical experience from Scalefocus Academy to succeed in a professional interview at any software engineering company.

**Are you up for the task?**
